

PCR Stimulant

Cat. No. ABTGAG111-01

Storage: at -20°C for two years

Description

PCR Stimulant can be used to increase sensitivity and specificity for GC/AT-rich template or complex template. It is especially suitable for Pfu enzymes. It is especially suitable for Pfu enzymes.

Application

- Complex templates

Volume of PCR Stimulant (μl)	Final Concentration
5	0.5X
10	1X
20	2X
25	2.5X
