Fluorescent signals can be collected during the annealing or extension stange. For ABI qPCR instrument, suggest to use the following signal collecting time :

\* For ABI Prism 7700/7900, the time to 30 sec.

\* For ABI Prism 7000/7300, the time to 31 sec.

\* For ABI Prism 7500, the time to 34 sec.

\* For ABI ViiA7, the time is at least 19 sec.

Two-step qPCR is more suitable for higher specificity assay. Three-step qPCR is more suitable for higher sensitivity assay.
